

Submitted to be approved
for BSCCP recertification

Organized by:

Hellenic Society for Colposcopy & Cervical Pathology

International Course in Colposcopy and Cervical Pathology

- Practical training (hands on)
- Lectures
- Hypothetical clinical scenarios
- Clinical cases presentation and discussion
- Debates
- Proffered Papers
- Exams for Greek Accreditation in Colposcopy

<http://www.hsccp-ioannina.gr>

November
10th - 12th, 2011
Ioannina, Greece

"Karolos Papoulias"
Congress Center,
University of Ioannina

Hot topics of scientific programme

Theoretical Sessions

- HPV
 - Update on the Natural history of HPV infection
 - Immunology of the HPV infection
 - HPV detection techniques
- Cytology-Histology
 - Cytology principles - The Bethesda System
 - Cervical Histopathology
 - When should we use HPV testing in clinical practice
 - Potential applications of HPV-biomarkers
- Colposcopy
 - Colposcopy principles (equipment, procedure, normal findings)
 - Colposcopic appearance of the abnormal cervix
 - Genital warts: Diagnostic approach and general treatment principles
- Advanced Colposcopy
 - Management of abnormal cytology
 - Diagnosis and management of glandular lesions
 - Diagnosis and management of VAIN, VIN, AIN
- Treatment
 - Principles of loop diathermy use
 - LASER ablation - conization principles
 - Treatment complications
- Colposcopy and Pregnancy
 - Management of CIN during pregnancy
 - Management of a pregnancy after conization
 - Invasive cervical cancer during pregnancy
- Cervical cancer
 - Colposcopic appearance of early cervical cancer
 - Surgical treatment of stage IB1 & IIA cervical cancer
 - Preserving fertility after treatment
 - Cervical cancer and Chemotherapy
 - Cervical cancer and Radiotherapy
- HPV vaccination
 - Understanding the benefits of HPV vaccination
 - Safety and efficacy of the bivalent vaccine
 - Safety and efficacy of the quadrivalent vaccine
 - Screening of vaccinated women
 - Promoting HPV vaccination coverage
- Related gynaecologic conditions
 - Contraception
 - Sexually transmitted infections
 - Endometrial pathology in the colposcopy clinic
 - Vulval dermatoses - Lichen Sclerosus
 - The role of assisted reproduction after cervical cancer

Interactive Sessions

- Debates
- Hypothetical clinical scenarios
 - Live demonstration of cases from the colposcopy clinic
 - Analysis and discussion on hypothetical clinical scenarios
- Clinical cases presentation and discussion
 - Presentation and analysis of actual clinical cases
 - Quiz with colposcopic and cytological images
- Practical training (*hands on*)
- Proffered Papers
 - How to evaluate a scientific paper
 - Presentation of the 4 best Proffered Papers
 - Voting and awarding of the best Proffered Paper

With the participation of worldwide renowned speakers!
